PROFILE

Integrated M.Tech Computer Science and Engineering student graduating in 2027 with strong knowledge of Java, Data Structures & Algorithms, Object-Oriented Programming, DBMS, SQL, and software development. Experienced in designing and developing scalable software applications using React.js, Node.js, Express.js, MongoDB, and REST APIs through internships and academic projects. Strong problem-solving, analytical, debugging, and teamwork skills with a quick-learning mindset.

EDUCATION

Sri Ramakrishna Engineering College, Coimbatore **2022-2027**

M.Tech Computer Science and Engineering (Integrated 5 years)

CGPA: 8.35 (Until 8th Semester)

Hindusthan Matric Higher Secondary School, Coimbatore **2019-2022**

HSC - 90.83% | SSLC - 89.8%

INTERNSHIP

Full-Stack Development Intern | C-DAC, Chennai **JUN 2025 - DEC 2025**

Project: Web-Based Surveillance and Video Analytics Platform using MERN

- Collaborated with a team to develop a Video Management System using React.js, Node.js, MongoDB, and Git, contributing to feature development, REST API integration, and real-time video streaming.
- Integrated YOLOv8 AI models with ONNX Runtime for real-time object detection, automating incident ticket generation, email alerts, and live analytics for enhanced surveillance monitoring.
- Designed a scalable multi-tenant architecture with modular backend services and responsive dashboards by integrating frontend, backend, and AI services through REST APIs, while using Postman and Git/GitHub for API testing and collaborative development.

Web Development Intern | Twisys Infotech, Coimbatore **DEC 2024**

- Developed a beauty parlour management portal using React.js, Node.js, and MongoDB, streamlining appointment scheduling and customer management.
- Implemented secure user authentication and appointment booking features, improving customer experience and operational efficiency.
- Built admin dashboard modules for managing services, payments, and customer feedback, enabling centralized business operations and better decision-making.

Web Development Intern | Kitkat Software Technologies, Coimbatore **JUN 2024**

- Developed responsive and dynamic user interfaces and dashboards using React.js, improving usability and ensuring a consistent experience across devices.
- Implemented interactive search and filtering functionality, enhancing navigation efficiency and overall user engagement.
- Improved application performance through component optimization, reusable UI architecture, and efficient state management.

PROJECTS

Anesthesia Controlling and Monitoring System | GitHub

Tech Stack: Python, HTML, CSS, JavaScript

- Developed a full-stack web application with responsive UI for calculating precise anesthesia dosages using pharmacological algorithms.
- Implemented JavaScript-based dosage calculation algorithms for drugs including Lidocaine, Bupivacaine, Articaine, and Mepivacaine, generating dosage, volume, and cartridge requirements.
- Designed an interactive monitoring interface to display real-time patient vital parameters and dosage results, reducing manual calculation effort and improving clinical workflow efficiency.

Canteen Management System | GitHub

Tech Stack: React.js, Node.js, Express.js, MongoDB, Socket.IO, JWT

- Designed and developed a full-stack web application enabling online food ordering, menu browsing, scheduled pickups, digital receipts, and real-time order tracking for institutional canteens.
- Built a secure authentication layer using JWT with role-based access control (Student/Admin), coupled with Socket.IO for live order status notifications and a kitchen Kanban dashboard.
- Achieved faster order fulfillment through streamlined REST APIs, automated status updates, inventory availability toggles, and a responsive admin dashboard for menu and specials management.

AI-Powered Recipe Assistant Chatbot | GitHub

Tech Stack: Python, Flask, SQLite, Pandas, HTML, CSS, JavaScript, Bootstrap

- Created an intelligent recipe search engine with prefix-based autocomplete and ingredient matching, allowing users to quickly find recipes by name or ingredients they have through Flask REST API.
- Developed a smart meal planner that generates daily meal suggestions based on calorie and protein targets, with dietary preference filtering, serving-size scaling, a favorites system for personalized use.
- Created a voice enabled cooking mode using the Web Speech API, enabling users to search recipes and navigate instructions by voice, with automatic timers, interactive nutrition dashboard using Chart.js.

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, SQL
- **Frontend:** React.js, HTML5, CSS3, Bootstrap
- **Backend:** Node.js, Express.js, REST APIs, WebSockets, Backend Development
- **Databases:** MongoDB, MySQL
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
- **Tools & Deployment:** Git, GitHub, VS Code, PyCharm, Postman, Docker (Basics)
- **AI & Data:** Computer Vision (YOLOv8, OpenCV), Machine Learning Basics, Power BI
