PROFILE

Integrated M.Tech Computer Science and Engineering student graduating in 2027 with hands-on experience in software development through internships and academic projects. Strong foundation in Data Structures and Algorithms, DBMS, Object-Oriented Programming, SQL, and problem solving in Java with experience building web applications and REST APIs using modern development technologies and industry best practices.

EDUCATION

Sri Ramakrishna Engineering College, Coimbatore **2022-2027**

M.Tech Computer Science and Engineering (Integrated 5 years)

CGPA: 8.35 (Until 8th Semester)

Hindusthan Matric Higher Secondary School, Coimbatore

HSC - 90.83% **2021-2022**

SSLC - 89.8% **2019-2020**

INTERNSHIP

Full-Stack Development Intern | C-DAC, Chennai **JUN 2025 - DEC 2025**

Project: Web-Based Surveillance and Video Analytics Platform using MERN

- Developed a Video Management System using React.js, Node.js, Express.js, MongoDB, WebSockets, FFmpeg, enabling real-time multi-camera surveillance, HLS video playback, and JWT authentication.
- Integrated YOLOv8 AI models with ONNX Runtime for real-time object detection, automating incident ticket generation and email alerts.
- Designed a scalable multi-tenant architecture with live analytics dashboards, camera health monitoring, modular AI detection pipelines, enabling scalable enterprise deployments across multiple organizations.

Web Development Intern | Twisys Infotech, Coimbatore **DEC 2024**

- Developed a beauty parlour management portal using React.js, Node.js, and MongoDB, streamlining appointment scheduling and customer management.
- Implemented secure user authentication and appointment booking features, improving customer experience and operational efficiency.
- Built admin dashboard modules for managing services, payments, and customer feedback, enabling centralized business operations and better decision-making.

Web Development Intern | Kitkat Software Technologies, Coimbatore **JUN 2024**

- Developed responsive and dynamic user interfaces and dashboards using React.js, improving usability and ensuring a consistent experience across devices.
- Implemented interactive search and filtering functionality, enhancing navigation efficiency and overall user engagement.
- Improved application performance through component optimization, reusable UI architecture, and efficient state management.

PROJECTS

Anesthesia Controlling and Monitoring System | GitHub

Tech: Python, Flask, MongoDB, HTML, CSS, JavaScript, REST API

- Developed a full-stack web application with responsive UI for calculating precise anesthesia dosages using pharmacological algorithms.
- Engineered RESTful API endpoints and MongoDB database integration for secure storage of patient data, dosage history, and real-time vital sign records.
- Built data visualization dashboard displaying patient vitals trends and dosage calculations, reducing manual clinical documentation effort by 40%.

Canteen Management System | GitHub

Tech: React.js, Node.js, Express.js, MongoDB, Firebase, Socket.IO, JWT, Bootstrap

- Architected a full-stack web application enabling online food ordering, inventory tracking, digital receipts, and real-time order status updates for institutional canteens.
- Built a secure authentication layer using Firebase for end-users and JWT with role-based access for admins, coupled with Socket.IO for live notifications.
- Achieved 35% faster order fulfillment through streamlined backend APIs, automated status tracking, and a responsive admin dashboard for menu and specials management.

AI-Powered Recipe Assistant Chatbot | GitHub

Tech: Flask, Python, NLP, Pandas, FuzzyWuzzy, SpeechRecognition, pyttsx3

- Created an intelligent recipe recommendation engine with NLP-based fuzzy search, ingredient matching, dietary filtering, and time-based quick recipes, serving responses through Flask REST API.
- Built voice-enabled interface using SpeechRecognition and pyttsx3 for hands-free search and audio instructions, providing reliable speech recognition under controlled environments.
- Developed smart meal planner generating daily meal suggestions based on dietary preferences, combined with favorites management system for personalized user experience.

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, SQL
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js, FastAPI, REST APIs, WebSockets
- **Databases:** MongoDB, MySQL
- **AI & Data:** Machine Learning Basics, OpenCV, YOLOv8, NLP, Power BI
- **Tools & Deployment:** Git, GitHub, Postman, VS Code, PyCharm, Vercel
